

# Slider Genoa Lead Cars

Slider cars run on ball bearing track. Roller/ball bearing sheaves pivot 60 degrees for easy trimming.

The 323, 1599, 1873 and 1874 have inner-race slider rods to help lower friction. Slider rods can be replaced with ball bearings to make the car adjustable under load. The 1663 car uses Polyslide material to help slide car. Car can be towed or used as a pinstop car.

Choose pinstop genoa lead cars for applications where lead positions change infrequently. Select Harken® pinstop track.

The 1995 and 1996 sheaves have roller bearings, while the 1613 and 1639 have axle bearings. Cars remove easily from the track to clean up deck.

**Use for:**  
Genoa leads  
Caprail leads

Removable stop limits inboard pivoting so lead can mount near cabin side

Sheave carrier pivots to accept unfair leads

Easy-to-operate lever pinstop

To order track see mainsail traveler track for the appropriate size car
